

BCC Equipment

BCC Precision Seeder—Worlds Best

With this machine it is possible to place exactly one seed in the exact middle of each cavity. Thinning has become a thing of the past! The unique combination of high precision and high efficiency has made this machine a worldwide success. Today it can be found in more than 140 nurseries around the world.

You can view BCC's full line of equipment and materials for tree seedling production, and cone and seed processing and handling by visiting www.bccab.com.
