

Shutterbox Seeder

The **Shutterbox Seeder** is a simple and inexpensive seeder for block or tray-type containers. Made of durable polycarbonate, this seeder has a seed reservoir on one side and a seeding frame. The top layer of the seeding frame is a slider with pilot holes so that the customer can drill holes to the exact hole size needed for the number of seeds to be sown or for a single seed size.

One unit includes

A Shutterbox Seeder and three slider plates.

*This is a custom product with several sizes available.
