

International Order Policies

International orders will typically ship via ocean container or air freight. We work with a variety of freight forwarders to move our product all over the world. We require payment in advance via wire/bank transfer prior to shipping the product, see below for instructions.

All shipments are shipped INCO terms CPT (Carriage paid to) or CFR (Cost & Freight) to the closest airport or seaport, unless specified otherwise. All Port/airport charges, taxes, duties, customs and any other destination charges are not included in the quoted shipping price and must be paid by the receiver. Delivery from the port/airport will also be the responsibility of the receiver.

You are free to arrange your own freight carrier. Pickup and payment are separate from our transaction. We do not pay your freight company for you, and we do not arrange pick up with your freight forwarder. We will notify you directly when your order is ready to ship, and you can arrange to have the shipment picked up. All correspondence with your freight company is to be direct, Stuewe & Son, Inc. Is not responsible for contacting your freight company.

Documentation we provide is the Commercial Invoice and Packing List. These will ship with the package. I will also send a copy of the invoice via email to expedite your customs clearance. Once our freight forwarder sends me the ocean bill of lading or the air waybill, I will forward that via email as well. Typically, an EXPRESS BL will be issued so there will be no stamped original.

Please advise if any other documents are required, this may require extra fees for courier, so it is good to know up front.

We require payment in full prior to shipping. For payment instructions, please see the wire information below. Be sure to inquire with your bank regarding a transfer fee, and include it in your payment, prior to sending the transfer.
