

FiberCell BioBased Medium

Our Biobased family combines different biobased fibers to create an environmentally friendly product with the degradation time desired by the customer. This is a paper with a broad range. It is used for propagation of a wide variety of crops.

Key benefits with our Biobased Medium paper:

- Manufactured from natural starch based fibers
- Does not contain any fossil or synthetic plastic
- The paper is Biodegradable
- Production time up to 14 months (depending on soil conditions)
- No glue on the paper, self-sealing fibers in material.
- Perforations allow roots to penetrate through paper for effective air pruning
- Thin paper (more meters on a roll), which makes it more cost efficient when it comes to freight and logistics

Specifications FiberCell BIOBASED Medium	
Segment	<ul style="list-style-type: none">- Herbs- Leafy Greens- Forestry- Flowers- Fruit- Nuts- Barries- Indigenous trees- Ornamentals
Production time	Up to 14 months (Depending on soil conditions)
Biodegradable	Yes
